A Perennial Border showing the effective use of Summer Phlox

HERE'S HOW TO PLAN A PERENNIAL BORDER

A colorful border can be accomplished with these lovely perennials. Here is a plan that we have prepared for you, which you can adjust to fit the space and your pocketbook. We have taken twenty-four of the very best among perennials, and here is how you can work this plan. If you want to use only 24 plants, these will be enough for a bed 8 feet long and 3 feet wide, using one plant for each space provided as keyed.

SPECIAL COLLECTION OFFER \$1-100: 24 plants, 1 each of 24, \$12.50. (Value \$15.75.)

If you want to make the bed 16 feet long and 3 feet wide, use 48 plants, 2 for each space.

SPECIAL COLLECTION OFFER \$1-101: 48 plants, 2 each of 24, \$22.50.

If you want to make the bed 24 feet long and 3 feet wide, use 72 plants, 3 for each space.

SPECIAL COLLECTION OFFER \$1-102: 72 plants, 3 each of 24, \$29.50.

However, if you have the space and want a really spectacular and colorful border, make the bed 30 feet long and 7 feet wide. Put 6 plants in each space as keyed and space them about 12 inches apart. You will have a picturesque border that your neighbors will greatly admire.

SPECIAL MONEY-SAVING COLLECTION \$1-103: 144 plants, 6 each of 24, \$54.50.

Other useful plants can be found in our Spring 1950 Garden Guide, page 4. If these plants were bought separately, they would cost considerably more; therefore, why not take advantage of these money-saving offers and start a perennial border this season?

Carroll Garden's Finest Tuberous-Rooted Begonias

Finest California-Grown Bulbs

Among the showiest of summer-flowering bulbs, lasting into the fall. Any good light soil with plenty of humus, in a fairly shaded location, will grow good Begonias. Mix a liberal amount of woods soil, well-rotted manure, compost or peat moss with garden soil to make it light in texture. Water often during dry seasons. These bulbs may be grown in window-boxes or large pots on shaded porches, or in any good selected spot in the garden that is fairly shaded and away from roots of trees that might rob them of all moisture and food. Such places as the north side of a wall or foundation are ideal. The blooms are perfect for cutting, particularly to float in water.
